

CALGARY

ALPINE PARK

CANADA

SOLAR ADVOCACY

A child in a blue shirt and tan shorts is climbing a wooden structure made of horizontal planks. The structure is covered with colorful handholds in red, yellow, green, and blue. The child is seen from behind, reaching up. The background is a clear blue sky with a small green tree on the right. The structure is flanked by two large, reddish-brown, curved shapes that resemble a stylized landscape or a large piece of art.

**READY
FOR THE
FUTURE**

The future of community.

True sustainable living is putting people first. It's making walking so convenient you don't always need a car. It's putting people's needs where they're most easily reached, and encouraging them to experience their own community. The future of community-building isn't in technologies alone, but in connections to the people and environment around us.

With an eye toward the future, Alpine Park provides a foundation of infrastructure to enable the rapid installation of environmentally-friendly power generation.

SOLAR READINESS

ALPINE PARK GUIDELINES

All homes built within the community are required to be solar ready with:

- ▼ 200-amp servicing
- ▼ Solar orientation for detached garages
- ▼ Solar conduit rough-ins

Solar systems themselves are not required. Technology is continually changing and by being solar ready, homeowners can take advantage of the high value post-possession rebate programs currently in place.

CANADA GREENER HOMES GRANT

The Canada Greener Homes Grant (CGHG) launched May 27, 2021, and is funded with \$2.6 billion over 7 years. This post-possession grant provides:

- ▼ Up to \$5,000 (\$1,000 per kW) toward the installation of solar
- ▼ Access to interest-free loans of up to \$40,000, with repayment term of 10 years (through the Canada Greener Homes Loan)

Scan the QR code to learn more about this program:

READY FOR SOLAR?

It's never been a better time to make the switch! After just 6 months in your new home, you qualify for **\$5,000** toward the cost of your new solar installation.

With payback periods of less than 10 years without rebates and interest-free 10-year loans available, you're saving money from day one, not years in the future!

AVERAGE MONTHLY SAVINGS

\$178.62¹

CGHL MONTHLY PAYMENT

~~\$171.50~~ AT FULL RETAIL

\$129.83² WITH CGHG REBATE

NET MONTHLY SAVINGS

\$48.79

¹ Based on City of Calgary Solar Calculator for comparable Evergreen address assuming 21 panels generating 9407 kWh/year.

² Assumes \$20,580 estimated upfront cost less \$5,000 rebate at 0% financing for 10 years.
